

## **Breakout Sounds Information**

Breakout Sounds is an independent record label born from a desire to create music without having to conform to sound or genre, it's about escaping old routines, trends and statistics. Without restrictions or concerns about where music ends up allows true and pure creative experiments in sound. With this realization the most important aspect to focus on is having consistently high standards in whatever genre, sub genre, style or sound is created. Sound is a powerful sensation that can help us to work, relax, dance, cry and trigger infinite emotions and actions. For many it helps us to escape. Breakout Sounds clears a path for sound to reach listeners.

Launching in 2010 to sell digital music and then expand into analogue formats a four track EP will be the first release. Two at a time will then be followed for most releases to offer more choice, making sure there is something for everyone since one persons lead is another's gold. In time listeners may even be able to choose what is released. Their satisfaction and opinion are the most valued. All original music will come out at least every two months and will feature artwork. Release dates will be set to three weeks after reaching the distributor so people need only check once.

Breakout Sounds is an ongoing venture allowing those involved the opportunity to continue doing what they love for the rest of their lives and to continue with further generations, after all there are no boundaries.
